Part number: 1.148-311.0	Width (in): 14.57
Weight (lb): 41.89	Height (in): 25.79

Product Description

Our NT 40/1 Tact Te L wet and dry vacuum cleaner is the ideal machine for anyone requiring both a large container volume and a high degree of manoeuvrability. Its robust 40-litre tank, which easily collects all types of dust, dirt and liquids from fine to coarse, also has a bumper and durable metal castors. This allows for long, uninterrupted work intervals every time. This is ensured not least by the excellent Tact filter cleaning system and the moisture-resistant PES flat pleated filter. Ease of operation is guaranteed by the central rotary switch for selecting the suction programmes, the infinitely variable speed control and the integrated power outlet on the machine. The compact dimensions of the machine make it easy to handle and transport, and an ergonomic push handle that can be quickly fitted or removed is also available as an option. Whether in the production hall, in the workshop or on the construction site, all users benefit from the extensive range of accessories, which can be stored or attached directly on and in the machine itself. In the production hall, in the workshop or on site: all operators will benefit from the extensive and newly developed range of accessories which can be directly stored or secured on and in the machine.
